COMMERCIAL TURF

JOHN DEERE 1026 COMPACT TRACTOR has excellent manoeuvrability and are easy to operate. They offer perfect stability and ride comfort and as they are compact they are easy to park and store. Standard features include hydrostatic transmission, 4 wheel-drive and power steering for smooth operation plus a deluxe seat and suspension, tilt steering and deluxe lighting kit for all-day productivity. The 1026 compact tractors are designed for power & productivity without making compromises on quality, versatility and cost-efficiency.

TRIMAX STRIKER 150 designed to work with light-weight compact tractors like the 1026 and is able to mow quickly at a high standard making it extremely efficient in terms of fuel and time. This multi-spindled rotary mower has 4 carefully positioned grease points and robust spindles making it incredibly low maintenance. Striker 150 has Trimax LazerBladez™ fitted as standard for improved grass distribution and reduced clumping. The full-width front- and rear rollers produce an attractive striped pattern and guard against scalping for a consistent finish. Variable height adjustment and the ability to withstand tough condition allow for year round mowing. Exceeding international safety standards with the added benefit of an enclosed cutting chamber means added safety for you and your team.

SCH MOUNTED DEEP AERATOR has nine heavy duty aeration discs on 50mm stainless steel axle c/w bearings which easily bolt onto the carrying frame. Aeration is important to improve drainage, reduce turf compacting, thatch build up and boost the health of lawns and the SCH Mounted Deep Aerator will serve your aeration needs to provide top class lawn treatment.
