Wellbeing Services

Looking after your people and investing in their wellbeing can lead to increased productivity, increased engagement and a happier healthier workforce.

Line Manager Toolkit: Mental Health

Video modules and resources to empower line managers to spot the warning signs of poor mental health in the workplace and help them feel more confident in holding supportive conversations with their team members.

Effective mental health support strategies have the potential to improve productivity, employee engagement, reduce absenteeism and help make businesses better places to work.

Developed by mental health professionals, the Aviva Line Manager Toolkit: Mental Health offers bite-sized videos to help your line managers support the mental health of their team. It also provides key information and guidance for line managers on the reasonable adjustments and adaptations which could be made to support their team members.
